WHAT DO WE DO?

Sage Innovation is a team of dynamic and committed global health and development experts and leadership strategists. We work with our clients to **think, design** and **build** collaboratively and effectively. Our services move solutions and people from ideation to impact at scale.

Think

We help our clients make smart decisions to achieve the greatest impact.

Strategic Planning: We work with clients to develop thoughtful, informed strategies that chart new directions for their organizations and issues.

Executive Leadership and Coaching: We support seasoned experts and emerging leaders build thriving organizations and fulfilling careers in global health and development. Through our tailored approach, we help individuals and teams achieve extraordinary results with renewed focus, the skills needed to navigate an increasingly complex global landscape and clarity required for success.

Team Building and Facilitation: We work with organizations big and small to ensure that teams are effective and achieve their highest potential. We support our clients both internally—to strengthen their teams—and externally—to provide strategic facilitation of important meetings and events.

Stakeholder and Opportunity Mapping: We identify the optimal partners and opportunities to meet our clients' goals. By mobilizing our national and global networks, we conduct in-depth research, analysis and outreach to position our clients for effective engagement and impact.

Catalytic Philanthropy: We identify opportunities for high-impact investments and provide strategic guidance and support to align partnerships and funding priorities with philanthropic goals.

Design

We create and launch new initiatives, programs and platforms to enable our clients to successfully deliver on their commitments.

Global Partnerships and Coalitions: We build and coordinate robust advocacy coalitions and technical partnerships to focus collaborative action, expand resources and drive change.

New Programs and Initiatives: We design programs and launch initiatives that expand access to quality health services, programs and life-saving commodities for women and children.

Technical Resources: We combine technical expertise with field experience to develop effective products, resources and tools for our clients to successfully implement innovative programs. We have developed technical and global guidance, manuals and tools to inspire and guide clinicians and advocates across a range of focus areas.

Build

We ensure our clients' strategies, initiatives and life-saving tools successfully reach the individuals and communities they are designed for.

Global Knowledge Dissemination: We drive change by building awareness and support for our clients' issues and solutions. We develop and implement dynamic communication strategies to expand demand for innovative programs, technologies and services.

Stakeholder Engagement: We employ dynamic advocacy strategies, cultivate opportunities for dialogue and conduct targeted outreach to build national, global and high-level political support for action.

Resource Mobilization: We design and support effective resource mobilization strategies. We help increase commitment and expand resources for life-saving solutions.
